Occupational safety and health review conducted by: \_\_\_\_\_

Occupational safety and health review date: \_\_\_\_\_

The table below is filled out in connection with security review regarding welfare measures

<b>Safety And Health Topic</b> See Handbook on OSH in construction	<b>Confirmed YES/NO</b>	<b>If not, please describe where and what the problems are</b>	<b>Describe the solution to the problem</b>	<b>Responsible person and date of solution</b>
<b>Is the work briefly?</b> e.g.: <ul style="list-style-type: none"> <li>• the work lasts no more than 3 days,</li> <li>• does not exceed 6 man-days, or</li> <li>• the daily work of the employees begins and ends at a place other than the construction site.</li> </ul> <b>During briefly work, employees have access to the following:</b> <ul style="list-style-type: none"> <li>• toilet</li> <li>• dining area</li> <li>• washbasin with warm running water</li> <li>• dressing and the opportunity to keep clothes and personal belongings</li> <li>• the opportunity to dry workwear, if it gets wet at work</li> </ul> ...and if there is a risk of infection, danger to come into contact with harmful substances and materials, the work is dusty or messy , high temperatures or very strenuous physical work – the employees have access to <ul style="list-style-type: none"> <li>• shower and dressing, where ordinary clothes and work wear are separated</li> </ul>				
<b>Work starts at the construction site and the work is not briefly?</b> In this case the the following measures are present (usually in the form of a trailer, cf. Decree No. 775 of 17 September 1992 on the interior design of portable cabins): <ul style="list-style-type: none"> <li>• Toilet</li> <li>• Washbasin with warm running water</li> <li>• Bathroom facilities with locker</li> <li>• Separate locker and dining rooms, and</li> <li>• Two cabinets for each employee?</li> </ul> Requirements for portable trailers can also be fulfilled by employees using welfare facilities in an existing building – i.e. toilets, canteen, shower, locker room, etc. Use value must, however, have at least the same standard as a regular trailer.				
There is <ul style="list-style-type: none"> <li>• 1 hand wash for every 5 persons</li> <li>• 1 shower for every 10 persons</li> <li>• 1 toilet for every 15 persons?</li> </ul>				
There is at the most 200 meters or a <b>travel</b>				

<b>time less than 5 minutes to the toilet.</b>				
<p>The composition of the trailer complies with the regulation  Regulation on arrangement of the trailers and the like  The Danish working environment service's Executive Order No. 775 of 17. September 1992.</p>				
<p>Sewer work, or work performed using asbestos, lead, asphalt, epoxy, polyurethane fulfill the specific requirements - including welfare measures - which are assigned to this kind of work.  See regulations with regard to these special areas.</p>				
<p>Provisions are somewhat relaxed because the job involves roadwork or other construction work which implies that the workplace is moved during the construction period.  The call centre of Danish Working Environment Authority (Phone +45 70121288) has been consulted in this respect.</p>
